Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-18, 25, 26, 27-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al 6424804.

Johnson et al discloses system having a mounting structure 32, 18 within a body and doors 51. The system has a platform 14 where a camera/sensor 12 is mounted, linear guide 24 that is engaged by the platform that is a linear structure disposed in parallel to the linear movement path of the platform, and mechanism 30, 31 for moving the platform. The camera 12 is directly attached to the platform 14 as shown in figure 6. The linear guide is connected to the mounting structure at a first end and to the platform at the second end. The linear guide is engaged by an annular engagement structure 26 that is connected to the platform and to stabilize the platform in an atmosphere. Please note that “an atmosphere” is broad in that it can be anywhere the platform is located. This can be at sea level to 20000 feet. The mounting structure is inside the body and limits intrusion into the body.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-24, and 31-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson et al 6424804.

As for the mechanism that is electrically, hydraulically, magnetically, pneumatically, linear motion screw, or clutch and brake driven, it would have been obvious to one skilled in the art to have used any mechanism that is needed to drive the platform as a mere substitution of parts. The applicant has not disclosed the criticality of different mechanisms.

Figure 1 of Johnson shows the camera in a fully extended position and in the "atmosphere". An atmosphere is the region of space where air surrounds the Earth. Hence this meets what is claimed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tien Dinh whose telephone number is 571-272-6899. The examiner can normally be reached on 12-8.
